DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4, and 6-21 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, although, the prior arts disclose a mobile communication network. However, none of them teach an out-of-band system providing out-of-band wireless communication, wherein the out-of-band system comprising an out of band transceiver is coupled with the in-band system, and the out-of-band system receives an out-of-band wireless communication and the out of band transceiver transmit an out of band communication such that the out of band system activates the in-band system causing the in-band system to transition from the sleep mode to the active mode as specifically described as claimed.

Regarding claim 10, although, the prior arts disclose a mobile communication network. However, none of them teach an out-of-band system comprising a transceiver coupled with the in-band system, wherein the out-of-band system activates the in-band system when the out-of-band system wirelessly receives an out-of-band communication, and the transceiver wirelessly transmits an out of band interrogation such that the in-band system provides wireless in-band communication as specifically described as claimed.

Regarding claim 14, although, the prior arts disclose a mobile communication network. However, none of them teach the transmitting a wireless out of band communication in response to receiving the out of band communication; activating the in-band system in response to the out-of-band communication; and transitioning the in-band system from the sleep mode to an active mode as specifically described as claimed.

Claims 2-4, 6-9, 11-13, and 15-21 are allowed as being dependent on independent claims 1, 10, and 14.
